

Defense Forensic Science Center

Research Associate Intern Program

Library Science/Archives

The **Defense Forensic Science Center** provides full service forensic support (traditional, expeditionary, and reach-back) to Army and DoD customers worldwide; provides training and research capabilities; serves as the executive agent for the DoD DNA databasing program; and provides forensic support to other federal agencies.

This program is a unique opportunity for students to conduct leading edge research in a premiere forensic facility. Position duties include creating an initial inventory list for archival documents and processing boxes of original materials, including ephemera, photographs, papers, slides, negatives, discs, etc. Items will require assignment of accession numbers, description of the images depicted, measurement of dimensions, and identification of formats. All work will lead to the digitization of the archival materials to standards, metadata creation and uploading of content into a system. Qualified interns should be collaborative, able to communicate, and well-organized. This is a paid internship.

4930 North 31st Street
Forest Park, GA 30297
